

ARE YOU A PRIMARY SCHOOL TEACHER? WHAT KEEPS YOU AWAKE AT NIGHT?

Marking! I can spend 1 to 2 hours every night just marking books!

With LbQ, every learner gets immediate feedback to their answers, with teachers able to see in real-time exactly how every child is progressing. This allows you to make decisions for effective interventions and planning... without those late-night marking sessions.

Finding and creating enough quality content for my class.

LbQ's amazing team of teacher authors have curated over 1,800 curriculum aligned Question Sets containing over 60,000 questions, including KS2 & KS3 maths, English and science.

I'm under pressure to be an expert in every subject. How do I help learners in areas I'm not a specialist in?

LbQ offers structured questions and feedback in subject areas you're less familiar with, so you can support your learners safe in the knowledge that you're using the latest curriculum structures, learning objectives and vocabulary.

My class size is huge. How do I support and challenge a wide range of ability groups?

Learners work through LbQ at their own pace, automatically moving on to more challenging questions, whilst less confident learners are

encouraged through private feedback to have another go. You can run up to 3 different Question Sets at the same time, or create your own Question Set so that work is geared to the right gaps or ability levels. LbQ differentiates yet unites your class and 98% of teachers say that LbQ has helped their class achieve more academically.

SATs are an enormous pressure every year.

LbQ believe that preparation and practise are not the same thing. Ideally, SATS preparation happens through a mastery approach from Year 3 onwards. Even better, once LbQ connects the performance data of individual children, these types of tests will become unnecessary.

There's not enough time to be creative in class, to offer the pastoral care I'd like or even have time for myself. I want my life back!

With no marking and easy to find lesson content, LbQ teachers say that they typically save 1 hour per lesson – or 3 to 4 hours per week. Think of what you could do with that time!

But is it easy to use? I haven't got time to learn something else!

100% of teachers who try LbQ say it's easy to use. Why not start today and see the impact in your first lesson.

BE THE TEACHER
YOU ALWAYS WANTED TO BE

ARE YOU SLT IN A PRIMARY SCHOOL? WHAT GIVES YOU THE GREATEST HEADACHE?

Tight budgets! Schools have never had to do more with less!

LbQ is funded by a charity with the aim of increasing equality through education. Our 60,000 questions are free to teachers, but for maximum effect learners should use the Question Sets with their immediate feedback using internet connected devices. LbQ provide affordable tablets for only 25p per day per learner. These devices can be used for LbQ and much more.

LbQ actually saves schools money. There is no wasteful photocopying required and, as our content is constantly updated and improved, there's no need to replace those old text books.

School results...after all, prospective parents look at the league tables!

Feedback is the most effective way to increase learner achievement, with research suggesting additional progress of up to 30% in an academic year. LbQ is based on this principle, with automatically recorded lesson results so that your teachers can see how effective their lesson was.

These great insights also create more meaningful communication with parents.

Plus...learners love LbQ and they tell their parents so! Some schools have even started after-school or lunchtime LbQ clubs. LbQ even encourages learners to behave better in class.

The new OFSTED framework and the well-being of my teaching staff.

INTENT LbQ breaks down the core curriculum subjects of maths, English and science into clear and structured objectives, with scaffolded Question Sets designed to support learning. With comprehensive coverage, LbQ supports your schemes of work.

IMPLEMENTATION With high quality content and automatic marking, LbQ enables your teachers to spend more time supporting their learners and planning great lessons. Learners themselves cover more in each lesson – typically 35 questions attempted – and receive immediate feedback for every answer. This ensures a deeper understanding of the subject matter.

IMPACT 96% of LbQ teachers believe that the pedagogy makes their lessons more effective and 98% agree that their learners grow in confidence and resilience.

100% of LbQ teachers say that it is easy to implement and not only do they enjoy using it, but it saves them valuable time, up to an hour per lesson. This reduces teacher stress, allowing your staff to have greater control, greater creativity and greater well-being.

SCHOOL IMPROVEMENT, EVERY LESSON
